

PROFESSIONAL SUMMARY:

Motivated and detail-oriented graduate with a strong foundation in analytical thinking and problem-solving. Seeking an opportunity to enhance my knowledge, gain hands-on experience, and grow continuously while contributing positively to the organization

AREAS OF EXPERTISE:

- Programming Languages : Java, Python (basic)
 - Frameworks : Django, Flask (basic)
 - Databases : MySQL Web
 - Technologies : HTML, CSS, JavaScript(basic)
 - AI & Integration : Python (NLTK,spaCy, Transformers)
 - UI/UX: Figma, Canva, Adobe Photoshop
 - Soft Skills : Teamwork ,Time Management, Leadership
-

PROJECTS:

- **COLLEGE EVENT GUIDED CHATBOT**- Developed a College Event Guide Chatbot using Python NLP (NLTK, spaCy, Transformers) with RAG,supported by data collected through web scraping.
 - **LOCAL PROBLEM SOLVER HUB** - LocalProblemSolverHub is a collaborative platform where users can report local issues and developers work together to create effective solutions. It aims to bridge real-world problems with technology to improve community-driven problem solving.
 - **PROMPTRIX** - Promptrix is a prompt engineering framework that helps structure and optimize inputs for Large Language Models efficiently. It enables modular prompt design with better token management and dynamic content handling for improved AI performance.
 - **RAG-QA** - is a question-answering system built using Retrieval-Augmented Generation (RAG) to provide accurate answers from documents or external data sources. It enhances response quality by retrieving relevant context and combining it with LLM-based generation.
-

INTERNSHIP:

NLP Engineer Intern — Data pattern || July - August 2025, Remote

Developed a College Event Guide Chatbot using Python NLP (NLTK, spaCy, Transformers) with RAG, supported by data collected through web scraping.

Data Engineer — Eastcom Systems PTE LTD || Jan - April 2026, Remote

Developed a Python-based solution to extract data from PDF documents and convert it into structured Excel format using pdfplumber. The system focuses on accurately parsing unstructured content and organizing it into usable tabular data.

EDUCATION:

- **Master of Computer Application (MCA)** — Excel Engineering College, Namakkal (Anna University) (2024-2026) With CGPA of 8.4/10
 - **Bachelor of Commerce with Computer Applications BCOM (CA)** —Sengunthar Arts and Science College (2021 – 2024) With CGPA of 7.4/10
-
