Summary

Full-Stack Developer and AI Enthusiast with experience in building web applications using Python, JavaScript, Django, and Flask. Skilled in developing responsive user interfaces and scalable backend systems. Hands-on experience in AI-driven solutions including NLP (NLTK, spaCy, Transformers) and Retrieval-Augmented Generation (RAG). Strong in problem-solving, data handling, and integrating AI into real-world applications.

Education

Excel Engineering College

Master of Computer Applications

Sep. 2024 – May 2026

Namakkal, Tamilnadu

Experience

Datapattern.AI

Generative AI Developer Intern

July 2025 – August 2025

Coimabtoe, Tamilnadu

- Developed an AI-powered College Event Guide Chatbot using NLP (NLTK, spaCy, Transformers).
- Implemented a Retrieval-Augmented Generation (RAG) pipeline to enhance response accuracy using contextual data retrieval.

Eastcom Systems PTE LTD

Data Engineer Intern

Jan 2026 – April 2026

Singapore, Remote

- Built a Python-based data extraction system to process unstructured PDF documents using pdfplumber. Ensured data accuracy and consistency through validation and error-handling mechanisms.
- Transformed raw data into structured Excel (tabular) format, improving data usability and analysis.

Projects

COLLEGE EVENT GUIDED CHATBOT

Python, Flask, Gradio, NLTK, spaCy, Hugging Face Transformers, Sentence Transformers, FAISS/ChromaDB, BeautifulSoup, Selenium, Pandas

- Developed an AI-powered Event Chatbot using Python, Flask, and Gradio, leveraging NLP techniques (NLTK, spaCy) and Transformer models with RAG-based retrieval (FAISS/ChromaDB), integrated with web scraping (BeautifulSoup, Selenium) and data processing using Pandas to deliver accurate, context-aware responses.

LOCAL PROBLEM SOLVER HUB

React, Flask (REST API), MySQL, NLP (spaCy, Transformers)

- Developed a collaborative web platform using React, Flask, and MySQL that enables users to report and track local issues, integrating AI-based text classification (spaCy, Transformers) to categorize problems and support efficient, community-driven solutions

PROMPTRIX

React, Tailwind CSS, FastAPI, MySQL, SQLAlchemy, JWT Auth, OpenRouter API

- Developed SmartPromptLab, a full-stack prompt engineering platform enabling multi-model AI execution (GPT, Gemini, Claude) with Chain-of-Thought pipelines.
- Implemented automated evaluation, prompt versioning, and analytics dashboard using React, FastAPI, MySQL, and OpenRouter API.

Technical Skills

Languages: Python, Java, JavaScript

Frontend: HTML, CSS, React.js, Tailwind CSS, Bootstrap

Backend: Django, Flask, Fast API

Databases: MySQL

AI /GEN AI: LangChain, Prompt Engineering, RAG, NLP (NLTK, spaCy, Transformers)

Developer Tools: Git, VS Code, Figma, Canva

Soft Skills: Teamwork, Time Management, Leadership

Certifications

Frontend Developer (Meta) — HTML, CSS, JavaScript, React.js, Responsive Web Development

Programming for python (Meta) — Programming, control flow and problem solving techniques

Google AI essentials (Coursera) — Fundamentals of AI, Prompt Engineering and Gen AI tools

Principles of UX/UI design (Coursera) — wireframing, prototyping and creating UI
